

**CIS 3760 – Software Engineering**  
**Instructor: Prof. S. Scott**  
**Individual Accountability Report (IAR) Template**

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

**Individual Accountability Report (IAR) Template**

The following questions **MUST** be included and answered completely for each submitted IAR.

**IAR must be submitted one of the following file formats: text or PDF.**

Q1. Student Name: Srinath Natarajan

Q2. Student ID: 1117670

Q3. Associated Team Deliverable:

Q4. Section#, Team #: Section 2, Team 3

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Understanding UML diagrams
- Understanding Sequence diagrams
- Agile methodology

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

- Several years of experience with all of the above with both professional and educational experience.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

- I did not learn anything about the above concepts/skills as I was already experienced with them.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

- I did a great deal of the UML and Sequence diagrams and provided help for the Sprint 0 document in terms of explaining the project structure. I also wrote about our proposed application solution.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

- For all of the above contributions, I collaborated with everyone in the group. We all met on Discord at the same time and worked on a collaborative Draw.io diagram at the same time.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

- I managed the time well. Our scrum master set times to meet and we all were available during those times and completed the work in the allotted time. For things that I could do on my own, I completed ahead of time before our next group meeting.
