CIS 3760 – Software Engineering
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template
The following questions MUST be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Tibor Ukropina

Q2. Student ID: 0961384

Q3. Associated Team Deliverable: Sprint 2

Q4. Section#, Team #: Section 2, Team 3

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Basic experience with React Native

- Experience with mobile development and testing

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

- Over the winter break I'd done some self-studying with React. I also had prior experience from our previous sprints.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

- I gained more experience with debugging React Native code, and gained more experience working on code that wasn't written by me.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

- I worked on user story #27

Q9. With whom did you collaborate for any of the above contributions (be specific)?

- I collaborated with Mackenzie on the user story and got help from Srinath with troubleshooting

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

- I did a poor job managing my time in this sprint. I underestimated my user story and left it for the last two days. I did this because I had two large assignments due for my other courses around the same time. I've taken accountability for this by requesting to work alone on the user story for Sprint #3, this way I can manage my time easier.
