CIS 3760 – Software Engineering
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template
The following questions MUST be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Mackenzie Josie

Q2. Student ID: 0937045

Q3. Associated Team Deliverable: Sprint 2

Q4. Section#, Team #: Section 2, Team 3

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Implementing and testing features in React Native

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

I was familiar with the environment from the previous sprint. My experience with React Native was better than it was in the first sprint but still much to learn.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

During this sprint, I learned more about how to debug React Native and troubleshoot problems with the environment. I also got a better understanding of interacting with a database using React Native. I still need to continue improving on my foundations with this language to be more competent with it in the future.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

- Troubleshooting issues with the environment for myself and other team members
- Testing the newly implemented features.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

- Collaborated with
    - Tibor and Srinath for troubleshooting
    - Testing with Srinath

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

I could have done a better job managing my time with this sprint as I had a lot of big project deadlines in other classes fall around the same time as this deliverable's, and as this sprint was not graded, I did not give it as much attention as I should have.
